FOUNDATIONS OF ESTHETIC DENTISTRY: A CCADS STUDY CLUB

JOIN US...

We invite dentists from the lower mainland to join us and participate in this unique study club. This hands-on mentoring group is led by Dr. Janet Roberts, who believes that the clinical training is only a portion of what constitutes a successful cosmetic practice. The curriculum is designed to encourage all registrants to further their individual skills at all levels of a focused cosmetic practice. The flexible format takes into consideration the unique demands and concerns of all participants. CE credits shall be given, and light complimentary refreshments provided at each session.

EXPLORE...

- Treatment Case Planning
- Treatment Case Presentation
- Digital Photography
- Veneers
- Practice Management
- Live Patient Treatment (in association with the California Center for Advanced Dental Studies)

Dr. Janet Roberts received her dental degree from the University of British Columbia (1977), and has completed extensive training at LVI on an ongoing basis. As a general practitioner with a keen focus on cosmetic and reconstructive dentistry, Dr. Roberts believes in sharing her experience and training with other GPs who are interested in 'bridging' the gap between a standard GP practice, and one focused primarily on restoration and advanced cosmetics.

Dr. Roberts has personally made this successful transition, and provided her patients with the most comprehensive smile enhancement options with beautiful and predictable results. Her office in Tsawwassen is a model for cosmetic dentistry, and demand for her style of top flight cosmetic services in Vancouver proper has led to the construction of her second practice location in the Coal Harbor area of downtown Vancouver.

"In recent years there have been amazing advances in the field of dentistry. Fusing art and science, we are now able to restore smiles to health, function, and beauty in ways that were not available even a few years ago. We not only improve smiles, but also people's lives.

A healthy, attractive smile can change far more than the way you look. It will change the way you look at life!"

-Dr. Janet Roberts
